

20-ft Refurbished Reefer Container on Lease for Pharmaceutical Cold Storage

Swift Setup

Box Storage

Pallet storage

THE CHALLENGE:

- Requirement for **pharma-grade cold storage** without investing in permanent infrastructure
- Need for consistent temperature control despite **frequent door openings**
- **Long-term requirement** with operational flexibility
- Safe storage of **high-value pharmaceutical products** in ambient Indian conditions
- Preference for a **leased solution** over capital expenditure

OUR SOLUTION:

- **20-ft Refurbished Reefer Container** on a **5-year lease model**, designed specifically for pharmaceutical storage applications.
- **Single-inlet temperature system** for stable cooling
- **Flameproof LED lighting** for safe internal visibility
- **Strip curtains** to minimise temperature loss during door openings
- Refurbished, pharma-ready interiors
- Reliable performance under ambient temperature conditions
- Container was delivered, installed, and made operational with **minimal site disruption**, allowing the client to scale cold storage capacity instantly.

Results That Made the Difference

- **Stable temperature integrity maintained** despite daily door operations
- **Reduced risk of product degradation** for sensitive pharma inventory
- Zero construction time and **no permanent infrastructure investment**
- **Cost-efficient long-term leasing** instead of heavy CAPEX
- Scalable and flexible cold storage aligned with production needs
- Reliable performance over extended tenure in Indian ambient conditions

Outcome Snapshot

KPI	Details
Industry	Pharmaceutical
Units Deployed	1
Model	Refurbished
Lease Period	5 Years
Application	Medicine Storage
Cargo Load Capacity	27,000 kg
Storage Pattern	Bulk Pharmaceutical Cargo
Door Opening Frequency	Daily
Temperature Control	Single Inlet System
Lighting	LED
Accessories	Strip Curtains

Clients Testimonial

“ The solution gave us the flexibility we needed without locking capital into permanent infrastructure. Temperature stability and ease of operations were exactly what our pharma workflows demanded.”

— Operations Team, Leading Pharma Manufacturer
